The Process of Suffocation

Pestilence

Smoke's penetrating the atmosphere
It comes forth from heavy industry
The layers of air surrounding us
Are venomed by large factory chimneysEnvironment pollution
Damage unmeasurable
Nitrogen concentration
Drive away the oxygenChoking in the gas we self produced
The death of mother earth I introduce
Chemical rain drips from the sky
The more we breathe, the sooner we dieClimates change, oceans vaporize
Woods becomes desert, no vegetation
Species of animals exterminated
The earth makes its last rotationThe process of suffocation
Coming genocide
Bio-circle is disturbed
Humanity's suicideWhy give a child its birth?
We are poisoning our earth
The heritage of this generation
Is a planet threatened with destruction
