

Comeback

Kane Brown

Six months passed since we both said goodbye
Never thought that I'd run into you here tonight
And I can't ever think your smile's the same as it was back when I saw you every day
I probably shouldn't say it
What I'm about to say We could make a comeback if you come back
We were on top of the world people wanted what we had
We could have it again don't you know that
We could make a comeback if you come back You haven't stopped me yet so I guess I'll keep going on
Oh, and I haven't even deleted your number from my phone
I've been wanting to call you every single day but I couldn't think how to rephrase everything
So just tell me, babe
If you feel the same way We could make a comeback if you come back
We were on top of the world people wanted what we had
We could have it again don't you know that
We could make a comeback if you come back We could make a comeback if you just come back We could make
a comeback if you come back
We were on top of the world people wanted what we had
We could have it again don't you know that
We could make a comeback if you come back Six months passed since we both said goodbye
