

Fugue

Ben Trexel

As I stand at the edge of existence
Nameless shores of infinity
Perpetual unbirth unraveling distance
Clandestine truths unveiled
Inborn imperfections preprogrammed shells
Spawning from the maelstrom
Mechanical drones feeding from thy mother
God machine reproduce
Untruth is this my fate
Coerced my life laid to waste
Untruth is this my fate
Coerced my life laid to waste
All hail execution
As this dream comes to its grim end
Blind pray to God to make them men
As all hopes crumble truths unveiled
The world we know's an abysmal hell
Disturbed state of consciousness
Incessant black madness
Perpetual unbirth unraveling distance
Clandestine truths unveiled
Disturbed state of consciousness
Incessant black madness
Gyroscopic trance encompassing coma
End me of this nightmare
