

# Facing and Backing

## Hot Water Music

i'll stand and push forward with outing hands and clear lines and i'll figure some definition i'm spent but still  
building out the words drawn the lines now you're sending me around again i've seen better days still i'll hold  
my ways what i don't need i won't take wide eyed different view stationed and seeing use cause it works for me  
that way i let it out don't know if it's true it's what i see and i'm just letting it shine cause you're missing all the  
energy you're nothing and mean nothing at all instead your legs should be standing up instead of folding your  
hands you should be giving them out instead of turning your back you should be showing your face why do you  
walk away
