Heaven on Earth (feat. Sherry St. Germain)

Steve Aoki

If you're facing out and you're a hologram
And the hardest part was following

I don't know what you got on me
I don't know where to go but everywhere
I am the one who's comes running to
This time we're gonna give it all away

Head through the clouds, there's a buzzing sky
And there's this word your love shines like
What it feels like, yes it feels like
Yes it feels like, heaven on earth
And it feels like heaven on earth
Traveling across the universe
Traveling across, traveling across
Traveling across the universe, the universe

If you're facing out and you're a hologram
And the hardest part was following

I don't know what you got on me
I don't know where to go but everywhere
I am the one who's comes running to
This time we're gonna give it all away

Head through the clouds, there's a buzzing sky
And there's this word your love shines like
What it feels like, what it feels like
What it feels like, yes it feels like
Yes it feels like heaven on earth
And it feels like heaven on earth
Traveling across the universe
And it feels like heaven on earth
Traveling across the universe

I don't know what you got on me
I don't know where to go but everywhere
I am the one who's comes running to
This time we're gonna give it all away
