

# I Need You

## The Movement

When ever I'm with you  
Something inside makes me wonder  
How you make me feel so right Every thing's groovy  
When you're around  
If this is love don't make it stop  
Or I go down I need you  
Cause under sad and lonely circumstances  
I underestimate my life  
I need you  
When I approach you with my loneliness  
I underestimate your love
