

Middle of the Night (Druzzì Remix)

Lilly Wood & The Prick

Waking in the middle of the night
It's nothing but dark
And be side by side
It feels alright
You've got no more than a few years ahead of you
And it feels alright
You're not scared, scared You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it Standing in the middle of the fight
It don't feel right
There's no one on your side
It don't feel right
There's not a place left to go and hide
And it don't feel right
Go escape, escape You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it You think about it Why don't you think about it It feels alright
It feels alright You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it Think about it
Think about it
