New Way (To Light Up an Old Flame)

Joe Diffie

I'm gonna find me a new way to light up an old flame
With a little bit of luck and a hug there's gonna be a big change
I've got a strong desire to start the kind of fire
That'll burn through a pouring rain
I'm gonna find me a new way to light up an old flameI've had all that I can stand, I've got roses in my hand
And old feelings in my heart
Now I'm knocking on her door, I can't stay away no more
'Cause we're no good apartI'm gonna find me a new way to light up an old flame
With a little bit of luck and a hug there's gonna be a big change
I've got a strong desire to start the kind of fire
That'll burn through a pouring rain
I'm gonna find me a new way to light up an old flameI'm going take her out tonight and put a spark back in her eye
That will never fade away
She'll see the love inside of me, a sight she never got to see
She won't know what to sayI'm gonna find me a new way to light up and old flame
With a little bit of luck and a hug there's gonna be a big change
I've got a strong desire to start the kind of fire
That'll burn through a pouring rain
I'm gonna find me a new way to light up an old flame
I've got a strong desire to start the kind of fire
That'll burn through a pouring rain
I'm gonna find me a new way to light up an old flame
