

# Once More to See You

[Mitski](#)

In the rear view mirror  
I saw the setting sun on your neck  
And felt the taste of you bubble up inside me  
But with everybody watching us  
Our every move  
We do have reputations  
Will you keep it secret  
Won't let them have it So come inside and be with me  
Alone with me  
Alone with me  
Alone  
If you would let me give you pinky promise kisses  
Then I wouldn't have to scream your name atop of every roof in the city of my heart  
If I could see you  
Once more to see you  
Come inside and be with me  
Alone with me  
Alone with me  
Alone  
If you would let me give you pinky promise kisses  
Then I wouldn't have to scream your name atop of every roof in the city of my heart  
If I could see you  
Once more to see you  
If I could see you  
Once more to see you
