Hush

Trills

You're gonna grow baby big and strong
Trust little baby, won't take long
T'll wrap you warmly in my care
Close to my heart I'll keep you there

Hush little baby don't you cry
You know your mama was born to die
Hush little baby don't cry loud
You know your life is running out

Walk into the water over your head
I'll bring you down, help you forget

Hush little baby don't you cry
You know your mama was born to die

Come close, come near, I'll rock you my dear
Come close, come near, I'll rock you my dear

Drag you down, drag you down, drag you down
Drag you down, drag you down, drag you down
Come now, come here, the light disappears
Come now, come here, the moment is near
Come now, come here, the light disappears
Come now, come here, the moment is near

Drag you down, drag you down, drag you down
Drag you down, drag you down, drag you down
