

Welcome to Yoglabs

The Yogscast

Lewis: Simon!

Simon: Yup?

Lewis: The new YogLabs employee manual's here, and I think it could be a good idea if I go through some of it with you, you know?

Simon: Sure. What's with the music?

Lewis: Well, it's been proven with tests that music helps people take in information, especially if they've just been cloned.

Simon: What?

Lewis: Don't worry about it! Just covers the basics you know. Brainwashing, thought control, cafe menus-

Simon: Cafe menus?

Lewis: Simple stuff we all need to know, yeah?

Simon: All right, cool.

Lewis: Welcome to YogLabs

The home of innovation

Where the only limit

Is your limited imagination

But sometimes things can maybe get a bit out of hand

So we've got a plan that you need to understand

Lewis: Page 4 - don't ever disturb the testificates while they're working

Simon: Oh, I might have already done that 'cos Mandrew got out and I was chasing him

Lewis: Page 7 - don't ever go in that room that has the black door on level three

Simon: Why, what's in there?

Lewis: Don't worry about it, it's fine!

Hannah: Come with me to YogLabs babe-ay

We make coffee that'll blow your cares away

Take one sip and you can't help but obey

Testificate: Just ignore that death ray

Lewis: So, you still with me Simon?

Simon: I think so, but Lewis there's something bothering me-

Lewis: Good to hear it! Let's carry on, shall we?

Lewis: Here in YogLabs

We pioneer technology

Robot: From robot girlfriends

Lewis: To goldfish bigonometry

So if youâ€™re feeling sick or are experiencing anti-gravity
It could be either radiation or a ripped space time reality

Simon: Um-

Lewis: So page 13 - if the microchip in your neck starts to itch, donâ€™t scratch it

Simon: Microchip? What the hell Lewisâ€ ow!

Lewis: And on page 18 - in the event of incoming missiles, please head to the bunker

Simon: Pardon? What? Missiles?

Lewis: Donâ€™t worry about it!

Hannah: Come with me to YogLabs baby
We really care about your personal safety
Donâ€™t you worry bout the time travel paradox
Ignore that triceratops
Testificate: His name is Steve

Simon: Lewis?

Lewis: Yeah?

Simon: Iâ€™m a little bit worried-

Lewis: Itâ€™s all under control! Donâ€™t worry about it!

Simon: I donâ€™t really know-

Lewis: Well sacrifices must be made, to achieve world domination

Simon: Uh-

Lewis: Itâ€™ll all be over soon, donâ€™t worry about that abomination-

Simon: No, no, thatâ€™s it, thatâ€™s it! Iâ€™ve had enough! Iâ€™m gonna put a stop to this!

Lewis: Simon!

Simon: Iâ€™m not doing what you tell me anymore!

Lewis: Mandrew stop him!

Simon: Mandrew and I are out of here!

Lewis: Ugh, why is this microchip not working?

Simon: Youâ€™re not the boss of me-

Lewis: Simon no donâ€™t go-

Simon: Iâ€™m not going to do what you tell me anymore! See? Iâ€™m going to push this button-

Lewis: Nonononono donâ€™t push that button!

Simon: And thereâ€™s nothing you can do to stop me-

Lewis: Donâ€™t press it-

Simon: Oh.

Hannah: Come with me to Yoglabs baby
Only 1 fatal incident lately
Initiate the re-building protocol
Sit back enjoy the show

Lewis: Ah, k, fresh clone. Simon?

Simon: Ah, hello!

Lewis: Oh the new Yoglabs employee manual has arrived. Would you like to take a look?
