### Verse 1

Girl let me get this tripod,

Make sure that the angles right.

Don't know if you know your lines, so this might just take all night.

Baby get up on the bed, I'll do all the things you like

Everything that I wanna do, to you.

Girl your wardrobe is the same suit that you wore on your birthday,

Baby girl ooo I want you, want you in the worst way.

Now I'm going to film you I wanted to since the first day,

Now I got a chance to, baby I got plans for youHook

Me, you take one, cut cut

Me, you take two, cut cut

Me, you take three same scene it's us in between the sheet oh ah

Me, you take four from the bed all to the floor,

Baby you so good I feel like you deserve an award

From the way you put that thing, on me girl it's a dream

And I know all the things to do...

So baby we can make a film, watch it over & over again

And I will play the lead to you...Chorus

We'll make a movie, movie, you'll play the starring role and I'll direct you on where to go

We'll make a movie, movie, up & down and roun' & roun' baby just you follow I'll show you what to do

We'll make a movie, movie oh x3

We'll make a movie and I'll let you do me do me ohh...Verse 2
