With Love

Syket

Best intentions bring joyless droughts
Pack your hacksaw come push me out
When your dentures prevent your smile
These adventures will fill your eyes
With love
With love
You've been going see-through, could do with a little sun
I'd give my liver to see you abide and ride shotgun
The back-end scandal awaits me, just can't do it alone
Your sweetheart probably hates me, but I'll send you home
Your dome filled up with love
With love
With love
Fill your eyes with love
With love
With love
Love will find you out
Be sure love will find you out
Love will find you out
Be sure love will find you out
As anybody with a kind word would know
Gonna find you
Love will find you out
Be sure love will find you out
As anybody with a kind word would know
Gonna find you
Love will find you out
Be sure love will find you out

Fill your boots
Fill your spine
Fill your dome
Fill your eyes with love
Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love

Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love
Love will find you out
Be sure love will find you out
With love
