

Stars and Sons

Broken Social Scene

Then when you let it
You asked for nothing
Why don't you share it
All of the time you live
There's something out there Just wanna know, how far to live on
there's one more avenue in this town
And in the red room
At a distance How would you know it
You're the same when you're living
I don't know it
It won't be this Just wanna know, how far to live on
Just wanna know, how far to live on All of the time you wait, there's someone out there
And no one can find all the red How would you show it
You can see through the red
I don't know it
It won't be this time
