Mind Trick

2 Skinnee J's

Check out the scene, were stuck in a tractor beam
With the R-2 Unit and the whole Skinnee team
From the moons of Endor, to the Land of Lando
I take the whole damn posse to wherever the van goesThe chase is on, were close to capture
Imperial forces dont really know what theyre after
Which way did they go? Which way did they go?
Excuse me for the question but I really got to knowMy rosy glasses give me passage
Inside the minds of masses
So relax when I ask this
Did you come to kick my ass or get your ass kicked?Im a mellow fellow not afraid of being yellow
But will I run from a gun when confronted
Hell no, Im Obi Wan, I use the force
These are not the Js youre looking for
These are not the Js youre looking forI hold my light saber versus Vader and envision
The invaders demolition, rebels on a mission
To defeat em red leader gonna be there in a flash
Exit to the X-Wing and Flexing with the crashSkinnees in control, now we go for gold
Like Han but never solo 'cause my crew be in the hold
Chilling like Hoth, they cant touch us with their blasters
We learned at the feet of the mastersIts an old Jedi mind trick, its an old Jedi mind trick
Its an old Jedi mind trick, its an old Jedi mind trickHold up, I froze up when the speeders showed up
Now the shields are down and the ships about to blow up
Imperial forces want to force us to extinction
But my force is from the source, of course I trust my instincts
These are not the Js youre looking forThese are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking forThese are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking forThese are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking forThese are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking for
These are not the Js youre looking for
