Every Part of Me

Victoria Beckham

When I look into your eyesPeople always talkin' 'bout, people always run their mouth
But when I hold you there's no doubt, my love for you is true
Before my life was ups and downs and happiness

I used to chase around

That's why, I'm glad you came 'cos now, there's no substituteAnd I don't care, whatever may come our way It's you and me, forever and ever to be 'cosWhen I look at you, I see me from my head to your toes

Every part of me

And everything you do, I did too

'Cos I'll always be a part of youWhen I look at you, I see me from my heart to your soul I'll always love you so

And everything I do, you'll do too

'Cos you're every little part of meI've seen how easy things can change and people never stay the same But baby, ever since you came, you made me feel secure

Yes, I think you should know that people gonna come and go

Be assured of this one thing, I will still remainAnd I don't care, whatever may come our way It's you and me, forever and ever to be 'cosWhen I look at you, I see me from my head to your toes Every part of me

And everything you do, I did too

'Cos I'll always be a part of youWhen I look at you, I see me from my heart to your soul I'll always love you so

And everything I do, you'll do too

'Cos you're every little part of meI know that there will come a day when you have to go away

But you have no reason to fear, I promise I'll be here

If someone ever [Incomprehensible] your heartAnd you feel your world is torn apart
My love for you will bring you through hard times

I'll help you be strongWhen I look at you, I see me from my head to your toes

Every part of me

And everything you do, I did too

'Cos I'll always be a part of youWhen I look at you, I see me from my heart to your soul I'll always love you so

And everything I do, you'll do too

'Cos you're every little part of meWhen I look at you, I see me from my head to your toes Every part of me

And everything you do, I did too

'Cos I'll always be a part of youWhen I look at you, I see me from my heart to your soul I'll always love you so

And everything I do, you'll do too

'Cos you're every little part of me You're every little part of me You're every little part of me

Every little part of me, you're every little part of me
