

How Low (Breakdown)

Graham Colton Band

Break down, break down
Break down, break down
Break down, break down I'm not about to change what you've become
And I won't tell you what to say
'Cause you don't care if I'm right or I am wrong
'Cause you just look the other way But you can take it from me
You will give up everything
She will lie, she will break you down inside So how low?
(Break down, break down)
Did you go?
(Break down, break down)
So how low?
(Break down, break down) And every time that you get her on the line
She is watching what you say
And you don't care if she's wrong or she is right
'Cause you just let her have her way You can take it from me
She will take you for everything
She will lie, she will break you down inside
'Cause you will crawl, you will bleed
You will give up everything
And you will lie, you will tell her anything So how low?
(Break down, break down)
Did she go?
(Break down, break down)
So how low?
(Break down, break down) And you can take this from me
She will take you for everything
She will lie, she will break you down inside
'Cause you can crawl on your knees
You can give her everything
You'll ask why but she won't tell you anything So how low?
(Break down, break down)
Did you go?
(Break down, break down)
So how low?
(Break down, break down)
