

Country Love (feat. John Popper)

Cee-Lo

Listen Well, I'm extremely cheap
I snore when I go to sleep
The little bit of nothin' have left
I'm strugglin' trying to keep Your friends may all agree
You could name a million things I'll never be
If you feel like flyin' feel free
You know that you could do better than me I'm a simple man
I'm doing everything I can
When God sent you my way
It was the moment my life began You stood by me through the storm
Well, I was hopin' you'd have my hand
I wish I understood how you were strong enough to understand
'Cause see no one is crazy enough to love me but you Never thought myself as much to see
Material things don't mean much to me
A good father, husband, and workin' man
Are sometimes so much to see And all them bills are due
I can't afford to buy you nothing new
We don't talk like we used to
I know that loving me is hard on you But you know I try
You are the completion of I
As long as we're in love
I'll never be ready to die We've come such a long way
And sometimes I want to ask you why
You continue to be the only star in my entire sky
Because no one is crazy enough to love me but you You see, girl you know I try
You are the completion of I
As long as we're in love
I'll never be ready to die We've come such a long way
And sometimes I want to ask you why
You continue to be the only star in my entire sky
But see no one is crazy enough to love me but you
I want to thank you, yeah
