

Heaven (little By Little)

Theory Of A Deadman

Now don't you be afraid
We can always talk about it
No need to medicate
'Cuz I know you're strong without it
You got me through the days
When I thought I couldn't face it
Let me count the ways
The love we have you can't replace it
Just hold on, I'm not that strong
There's a little piece of heaven
Right here where you are
The fact that you keep trying
Is what sets you apart
Help me find the reason
And I'll help you find the way
To get rid of all your pain
Little by little, day by day
Now you're far away
And I'm alone to cry about it
It's not a better place
When you die and leave me here to stay
Hold on, I was never that strong
There's a little piece of heaven
Right here where you are
The fact that you keep trying
Is what sets you apart
And help me find the reason
And I'll help you find the way
To get rid of all your pain
Little by little, day by day
You'll get stronger
If you need me I'm not far away
So just hold on, I'll help you find the way
I'll help you find the way
There's a little piece of heaven
Right here where you are
The fact that you keep trying
Is what sets you apart
Help me find the reason

And I'll help you find the way
To get rid of all your pain
Little by little, day by day
Little by little, day by day
Little by little, day by day
Little by little, day by day
Little by little, day by day
Little by little, day by day
