

Neva Antiquated

Jedi Mind Tricks

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"The rapper Ikon be throwing cerebral blows in telepathic forms"

[Ikon the Verbal Hologram]

Complexities break entities when hardcore be the factor

Physically shatter by the cause of the megacosm distractor

Fractured by my supernatural forces, face losses

As I break backs like Superman on horses, word ajar

Ancient warrior like Thor

Spiritual like the Ibis god Thoth

Complex construction by the technician will dismantle your collective mind

Enemy of mankind, with Egyptian archaeological finds

dwelling in the dungeon of time

Monomaniacal beat seeker

Swarming like locusts into your speaker

Examining your communication systems with cybernetics

Key notes of my flows or get froze with cryogenics

East coast domination for the D-U-B massive

Gathering at black masses to gain knowledge of the clashes

of past rhythmic masters

After the smoke clears, brain matter is discovered

Smothered by my soundscapes that have left you dismantled

Enchanted by my verbals as Ikon be burning candles

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Futuristic, neva antiquated"

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Causing cataclysms, to serve a purpose"

Emerging from the mist is not an individual but four

hardcore concepts causing everything to be raw

8804 AD causes misery that be abominable

Evil like three times hexagonal

To test my squadron and watch your macrocosm turn to particles

Non-particles are non-particles

Like the nucleus of an atom

The corpuscles which carry the oxygen from the lungs gather patterns

Energy from the soul, black hole, like spirit of Kukido

Sun, black circle of one, level of brevity is none

Transformed by gods of sun
Industrial power get devoured by the demonic
Read the fine rhymes with mental +War Games+ like Matthew Broderick
Revive shit, or live shit defy the carcass
My war sons and born sons revolve around darkness

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Futuristic, neva antiquated"

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Causing cataclysms, to serve a purpose"

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Futuristic, neva antiquated"

"The rapper Ikon be throwing cerebral blows in telepathic forms"

"Causing cataclysms, to serve a purpose"

Spiritual violence leave your alliance in microscopic fragments
My circle of darkness is ferro-magnetic
Suffer Chinese water torture, my word is water
Transcendental planets will vanish like ???????? daughter
Hypnotical regions in my mental, a rhythmic cycle
Recitals of euthenic theories have been retitled
To be digested by the masses, I smash kids with verbals
Gortex through your chest causing incidental murders
Of weak minded emcees getting caught up in my hurdles
of chemical disruptions, by sodium chloride, potassium, denatonium benzote
Ultimate sacrifice to the gods bloodier the kings
Son of Barada, know the mode of darkness like Bhagavadanta Prabhupada
Infinite light, space and time rhyming physics
Polyrhythmic planetariums relate sounds from aliens on other planets

[Ikon / Sun Pharaoh]Complexities bring entities when hardcore be the factor
Physically shattered by the cause of the macrocosm distracter
Fractured by my supernatural forces, face loses
As I break backs like Superman on horses
Word ajar, ancient warrior like Thor
Spiritual like the Ibis God Thor
Complex construction by the technician
Will dismantle your collective mind, Enemy of Mankind
With Egyptian, archeological finds
Dwelling in the dungeon of time

Swarming like locust into your speaker
Examining communications systems with cybernetics

Key notes of my flows will get froze or cryogenics
East Coast domination for the D-U-B masses
Gathering at black masses to gain knowledge of the clashes
Of past rhythmic masters, would end up bending, never-ending
like the sky
One-point twenty-one gigabytes to defeat me like Marty McFly
So why, would you battle with the recipe
Got rappers sweating harder than some retards on Jeopardy
One time for your mind, no doubt
(Chorus)
My Jedi Mind Tricks will break your molecular structure down.
(Return of the Jedi)
My Jedi Mind Tricks will break your molecular structure to
pieces.
(Return of the Jedi)
My brainstorm will swarm into your sections
Scientific lessons and my possession unload within my session
Injections infesting insight am I causing tension
Blessing mad crews is my obsession

Intentions to make you change professions
Wisdom imprison dejects leaving you vexed
My cerebral vortex rips erects when I infest (bless)
We deep scriptures that's evil
There's ? my cerebral, then ? remain imperial
Unbelievable lyricism will leave incisions
Cause pain like circumcision as you recognize (the realism)
The G-O-D verbally damage M.C.'s
Tragically come and battle me, bare witness to insanity
My corrupted mentality, plan to slaughter your family
grammatically
I bless the microphone with strategy
Your alliance is left in silence, victim of verbal violence
Deadly vocabulary, the God be dropping science
No doubt
(Chorus)
Amongst the illest individual's, I bless the mentals of
criminals
With materials formulated to penetrate cerebrals
I'm lethal, imperial type scriptures infiltrate, then split you
Simulating your nugget when I hit you
Emerging from the mist is not individual but four
Hardcore concepts causing everything to be raw
8804 AD causes misery that be abominable
Evil like three times hexagonal

Test my squadron and watch your macrocosm turn to particles
Non-particles are non-particles
Like the nucleus of an atom
The corpuscles which carry the oxygen from the lungs gather
patterns
Energy form the soul
(Fade): Black soul like spirits of Kukido
(Chorus)
