

A Burn or a Shiver

Edison Glass

When we hear it, we need to listen close
Yeah, we feel it, first a draft and then a windIt will feel like a burn or a shiver
Yeah, we feel it, it's a pull to the earthLike a hand on the top of your head
You feel safe here, you can dance hereCan we hear it? We need to listen
First a draft and then a windCan you hear it? A wave before it breaks?
Can you feel it? A calm before the storm?Lets keep this passion flowing
Like a child, I wait for loveLike a hand on the top of your head
You feel safe here, you can dance here
There's a love that surrounds the room
It's a quiet sound that's screaming out
And we fall under the weight of gloryWe fall under the weight of glory
We fall under, we fall under
Can you feel it? A wave before it breaks?Like a hand on the top of your head
You feel safe here, you can dance here
There's a love that surrounds the room
It's a quiet sound that's screaming out
And we fall under the weight of gloryLike a hand on the top of your head
You feel safe here, you can dance here
There's a love that surrounds the room
It's a quiet sound that's screaming out
And we fall under the weight of gloryWe fall under the weight of glory
