You'll Never Know

VersaEmerge

You'll never know
I didn't want it to go the way it went south
Not a word from my mouth
But from the moment I shook your hand I was determinedWhen I'm near you I don't speak, I barely look
I'm afraid you'll see it in my faceEach time it, honey, drips right of of my lips
I never stick, so how'd you get me stuck in this
Each time it, honey, drips right off of my lips
And now I wish you never got me stuck in thisBut it won't show and you'll never know
I'll lay low and you'll never knowYou'll never know
But my left brain took the wrong things east
You've got me all crazy
Come off lazy but I'm more alive on the insideWhen I'm near you I can't speak, I never look
I'm afraid you'll see it in my faceEach time it, honey, drips right of of my lips
I never stick, so how'd you get me stuck in this
Each time it, honey, drips right off of my lips
And now I wish you never got me stuck in thisBut it won't show and you'll never know
I'll lay low and you'll never knowI was smiling like a lion
Buried myself inside your neck
Oh west, clawed my hands around your chest
North with some regret, I've never felt like thisEach time it, honey, drips right of of my lips
I never stick, so how'd you get me stuck in this
Each time it, honey, drips right off of my lips
And now I wish you never got me stuck in thisBut it won't show and you'll never know
I'll lay low and you'll never know
It won't show and you'll never know
I'll lay low and you'll never know
It won't show and you'll never know
I'll lay low
