

# How Many Planets?

## They Might Be Giants

Mercury, Venus, Earth, Mars  
Asteroid belt  
Ceres, Pallas, Vesta  
And a bunch of other stuff Jupiter, Saturn, Uranus, Neptune  
Don't forget about Pluto, Eris  
And a bunch of other stuff Mercury, Venus, Earth, Mars  
Jupiter, Saturn, Uranus, Neptune  
And a bunch of other stuff  
And a bunch of other stuff And a bunch of other stuff  
And a bunch of other stuff  
And a bunch of other stuff
