

Everywhere But Here

[Nick Lachey](#)

Here is the place we used to go, we were laughing
Hand in hand walking down the road we were happy
Here is the corner where you said kiss me stupid
I remember you in red We were something good
We were something, yeah
Weren't we something? You're in my head, you're under my skin
You're everywhere but here, right here
It's a mystery, how you can be
Everywhere but Here's the diner where we meet on your lunch break
Corner table just you and me on a Monday
In the rain we ran and ran to your apartment
You called in sick to work again We were something good
We were something, yeah
Weren't we something? You're in my head, you're under my skin
You're everywhere but here, right here
It's a mystery, how you can be
Everywhere but here You're everywhere but here, oh
You're everywhere but here, oh
You're everywhere but here We were something good
We were something, yeah
Weren't we something? You're in my head, you're under my skin
You're everywhere but here, right here
It's a mystery how you can be
Everywhere but here It's a mystery how you can be
Everywhere but here
