Mystery

Dio

Can you hear me
Can you see
There's a storm on the edge of the sky
Does it matter
It does to me, I can tell you whyWhen there's thunder, there should be rain
But it don't always follow the rule
And is the wise man always right? No he can play the foolIt's always a Mystery, not what it seems to be
It's always a Mystery, just like you and meWe are lightning
We are flame
And we burn at the touch of a spark
If there's fire, but no one sees
The there's only the darkJust imagine, will you try
I can see that you've opened your mind
Silver linings can disappear, but they always shineIt's always a Mystery, not what it seems to be
It's always a Mystery, just like you and meChorus Out
