## DJ Igacorosas

I know, I know, from the assembly line  
I know, I know, the three laws of my  
type  
I was not built to lie I was not made to smile  
I ask my positron self  
why am I born apart every night, every morning  
there's no reason for my eyes to glow  
every day  
we work alone inside the big dome I know, I know, all data and functions  
I don't care what I am  
I know, I know, the power of the sun  
I am the never man why do I dream of kites  
I ask my kindred spirit whatever to serve my master  
anything to save my master I know, I know, the same old daily grind  
I know, I know, the passage of my time
