The Way That You Are

Atomic Kitten

Baby, baby, baby you're the one
Keep me wait baby all night long
Lookin' it over, thinkin' about
All the times we spent together
Don't worry about it, 'cause the feelings
I have no longer seem to be with me
Alone in the dark till the night turns into day
Falling apart, does life get in the way
The way that you are the look in your eyes
Feels like my world is coming together
The way that you smile just for a while
I know it took some time to discover you're the only one
Baby, baby, baby you're the one
Keep me wait baby all night long
Made it through the bad times cried all my tears
Have to move on with my life now
Now that I will be strong now you'll always be mine
Never want to say goodbye
Alone in the dark till the night turns into day
Falling apart, does life get in the way
The way that you are the look in your eyes
Feels like my world is coming together
The way that you smile just for a while
I know it took some time to discover you're the only one
Baby, baby, baby you're the one
Keep me wait baby all night long
No more hurting to get me down, no more sadness to be
No more waiting til you come around
We know that you're the only one for me yeah
For reasons maybe only I can see
The way that you are the look in your eyes
Feels like my world is coming together
The way that you smile just for a while
I know it took some time to discover
From one broken heart to another you're the only one
Baby, baby, baby you're the one
Keep me wait baby all night long
Baby, baby, baby you're the one
Keep me wait baby all night long
