Twenty Twenty

Wavorly

Time flies when you have fun
But when the world falls down you turn and run
Like it's over now, over now
But there's more to Who you say you know
And it's your own fault your faith won't show
Like it's over now, over now
And it's your timeYour time though no signs seem congruent
You'll find the design plays into it
Time to let this go, you never had control
We can look back to when He was there for usTake all that you have learned when you were on your face
Now it's your turn to give it out, give it out
Looking back to when the lights went out
There never was a reason for you to doubt
And it's over now, over now
And it's your timeYour time though no signs seem congruent
You'll find the design plays into it
Time to let this go you never had control
Look back home weary soul
Recall the times of old to face the new
Your faith will overcome
We can look back to when He was there for us
