Resistance

Bombardier

Protests in New York
Listen to the call of the wild
Brother, sisters carrying signs
Breathe deep before it's too late
The sky is falling, burning your eyes
Down in New Orleans river's boiling
Nothing living, nothing to eat
Thank the Lord, daddy's working 8-5
Paying the doctor, baby's got cancer
Give and take
Has all we've learned been wrong?
Look around at what we've been given
Maybe we've taken too long
Resistance, shouts the man on the right
Can't solve the problem overnight
Resistance, Listen to the call of the wild
Burning coal
Got to keep the company warm as
The rain keeps killing the trees
Cut 'em down quick
Pay the man his wage, he's making paper
To fuel the "Information Age"
Out in the Midwest
Hear the roar of the plough
Turning grassland into sand
Got to feed the people more every day
But the wind keeps blowing the land away
Give and take
Has all we've learned been wrong?
Look around at what we've been given
Maybe we've taken too long
Resistance, shouts the man on the right
Can't solve the problem overnight
Resistance, Liberal opposition crying violation
Stop the madness
Resistance, Through the din, one voice we should hear
Resistance, Listen to the call of the wild
There's no easy solution
The price is high, and it's time to pay

Turn of the century vision
Focused on a better way
Resistance, shouts the man on the right
Can't solve the problem overnight
Resistance, Liberal opposition crying violation
Stop the madness
Resistance, Through the din, one voice we should hear
Resistance, Listen to the call of the wild
