## The Honeydogs

Baby, every now and then you disappear from this earth  
And where you been and where you go I don't know  
But when you didn't up for till 2 I'm like where was you  
Late again, didn't call on a cell that I bought  
I figured out when you open your mouth  
First you start forgettin' then your palms start sweatin'  
Then you twitch, twitch  
You can't disguise when you're caught in a lie  
You always reply with a twitch, twitch  
It's true your body language told on you  
Tell me what'd you do  
First you lie, start to stutter  
[Unverified] You're guilty and one day you gonna feel me  
But you should know it's not right  
It's not okay, I wasn't born yesterday  
Speak up, I can't hear you  
What did you say boy, wussup?  
You so crazy acting this way  
Is there something in your eyes?  
'Cuz you twitch when you look at mine
