

You Made Me Live, Love and Die

Willie Nelson

I cried and cried my heart out but what good does it do
Crying never bothers anyone so cold as you
I've thought the whole thing over and now I'll go and find
A better place where angels heal broken hearts like mine You made me live, you made me love and now you'll
make me die
I'll never live or love again there's no need now to try
I'll say farewell to this old world this is my last goodbye
You made me live, you made me love and now you'll make me die And just for night is over I'll never see the
day
I'll hold your picture to my heart then I'll be on my way
I'll say farewell to this old world this is my last goodbye
You made me live, you made me love and now you'll make me die
