

The Day You Come

Powderfinger

Memories are fading, a single voice complaining
While days are stacking up
Its hardly worth debating, the people are frustrated
Drink from poison cup
The system is collapsing, conscience is relapsing
The damage has been done On the day you come rising up
On the day you come rising up Vision is rejected, the peoples choice is tested
So ignorance has won
Children are infected, remedy suggested
Dont drink from poison cup
Overpopulation, media sensations
The damage has been done On the day you come rising up
On the day you come rising up
