

Live As One Already Dead

Savage Messiah

I see a world that's closing in
Through the darkness and the din
Hope's the fading light that flickers in the distance
When all minds align
Conspire in time
Faced with the fallen divide
So live as one, Already dead
Face your fears
Betray the dread
Live as one, One already dead
I see a world that's losing hope
Empty prayers of lives evoke
The setting down, To watch it fade away
So live as one, Already dead
Face your fears
Betray the dread
Live as one, One already dead
Already dead
Into the face of falling
Lost by the false cries calling
So live as one, Already dead
Face your fears
Betray the dread
Live as one, One already dead
Already dead
