Electricity

Arctic Monkeys

Darlin' tell me something I don't know
Be my baby, be my GTO
Call me something no one else calls me
I forget how I want it
That electricity

My heart was breaking and got left unlocked
Didn't see you sneak in but I'm glad you stopped
Tell me something I don't already know
Like how you get your kisses to fill me with electricity

Love like locked horns
Love like dominos
Be my midnight
Be my ebb and flow
I forget how I want it
How it crept up on me
It takes over
Electricity

And my heart was breaking and got left unlocked
Didn't see you sneak in but I'm glad you stopped
Tell me something I don't already know
Like how you get your kisses to fill me with electricity

Separated
There I face it
Love like thunder
Love like falling snow
Tell me something I don't already know
Like how you get your kisses to fill me with electricity
