

Still Wonder

[Jonny Lang](#)

I wonder about her, I wonder where she went from here
Still wonder about her but nothings comin' into clear
Since she left me all alone, my days go by like years Well I'm thinkin' about her and all the things she used to
say
Still thinkin' about her but something's gettin' in the way
I remember when she told me, she would up and leave me someday I drive around in circles through the city
Just waitin' for the lights to change
But right about when midnight hits me
Moonlight gets me feelin' kind of crazy Oh, I wonder about her, does she still wear that same old ring?
No I still wonder about her and I know it ain't no big thing
Well she left me all alone now and I'm just waiting for my phone to ring
