

Shoot For The Moon

Busta Rhymes

As we go way beyond sky's the limit and you know who we are
We shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars
We 'bout to do it real big like outta this world and we takin' it far
Shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars, let us
Now don't you think this shit's outrageous?
At this point if you don't see I'm one of the greatest
I play the long time up in the league with the majors
In every history book they add a couple more pages
Like about the way I take 'em through stages
On different levels, peep the way it read on the gauges
Regardless I'ma love 'em, I don't care how they hate us
No matter how they try, see they could never replace us
Like mommy always said beware of the dangers
Embrace genuine love, be careful of strangers
'Cause when you are the best they try to weaken and change us
They don't recognize at first but always do when you're famous
Like I live my life bold and courageous
And invest my time and always calculatin' my wages
And let me lead the march, they'll probably start to parade us
Because you know that I'm comin' to save us
As we go way beyond sky's the limit and you know who we are
We shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars
We 'bout to do it real big like outta this world and we takin' it far
Shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars, let us
I spread my wings takin' off properly
I laugh at muh'fuckers that'll think they can top me
I laugh harder 'cause somebody said that they dropped me
When I'm flyin' through the sky, now how the hell they gon' stop me
Like most of the time it's good to be patient
Now I'm back with the crack, sorry for keepin' you waitin'
Prepare the food right for the street and season the steak

And grab a champagne glass and put it up, we celebratin'
Like and tell me who you tryin' to race with
If you ain't notice nigga I be ridin' a spaceship
I'm light years ahead and way beyond all the fake shit
I gotta stay away from trash because I probably'll break shit
Like I know it's kinda hard to believe this
The way I always come back and return with the heat, bitch
This shit ain't a secret, son, it's hard to defeat this
Risn' out the ashes, flyin' like a Phoenix
As we go way beyond sky's the limit and you know who we are
We shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars
We 'bout to do it real big like outta this world and we takin' it far
Shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars, let us
See now you see I'm back in the zone, B
And it feels good to be home with Sylvia Rhone see
Back to smash on the planet, niggaz know I'm the only one
To be back with the authentic to smash all the phonies
Like we mostly do the thing that you can't teach
And then send 'em a rhyme into that bullshit you can't reach
Then I give you shit that make the hood wanna bang in the street
And state my word is bond, I live out what I speak nigga
As we go way beyond sky's the limit and you know who we are
We shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars
We 'bout to do it real big like outta this world and we takin' it far
Shootin' for the moon and land on the stars
Let us land on the stars, let us land on the stars
Let us land on the stars, let us
