

Star

Vitas

English Version

So many times I asked myself
I was born into this world and grew up for what
And why the clouds float and rains pour
In this world I won't except anything for myself
I would fly beyond the clouds but no wings
The starlight lures me from afar
So hard to reach the star
Though the goal is just beside my hand
Will I have the strength for the throw
I don't know

I'll wait just for a moment
And then get ready for my journey
Lead me to my dream and hope
My star don't burn out yourself please
Wait for me

How many paths do I have to go by
How many peaks should I conquer to find my own self
How long should I keep I keep falling from the cliff
How many times should I start from the beginning
And any sense will it be

I'll wait just for a moment
And then get ready for my journey
Lead me to my dream and hope
My star don't burn out yourself please
Wait for me
