

Another Lifetime

KeKe Wyatt

Last night when I was all alone
Cleaning my closet out
I found an envelope, a letter that you wrote
Before the chemistry faded out It got me in my track and caught a flashback
Now I'm feeling all nostalgic
Every word I read
The memory is ... Now I miss you in my life
Oh, baby, but it's painful to see you now
But I know some day, some how
That we are gonna reunite
Oh, baby, don't ask me when
But I know I will meet you again, right now We only hurt each other, baby
So find another love, baby
But I believe that you will not
We're gonna meet in another lifetime And right now you're not the one
So don't let that break you up
But I believe that you and I
Gonna leave me down like that
We gonna meet in another lifetime I can't pretend that I don't wonder
Where you sleep at night
I can't stand that deep inside i know
That you found another love But if you deserve to love and meet someone
Even if the love ain't with me
And if you let it go and in control
Even though I know that will kill me We only hurt each other, baby
So find another love, baby
But I believe that you and I
We're gonna meet in another lifetime And right now you're not the one
So don't let that break you up
But I believe that you and I
Gonna leave me down like that
We gonna meet in another lifetime
We gonna meet in another lifetime Now I miss you in my life
Oh, baby, but it's painful to see you now
But I know some day, some how
That we are gonna reunite
Oh, baby, don't ask me when
But I know that I will see you again, We only hurt each other, baby
So find another love, baby

But I believe that you and I
We're gonna meet in another lifetime And right now you're not the one
So don't let that break you up
But I believe that you will not
Gonna leave me down like that
We gonna meet in another lifetime
We gonna meet in an
