

# Another Cold Day

## Caliban

With open arms, I am waiting  
With open arms, I see the end  
With open arms, I am dying  
Dying a mournful death The landscape wipes out my tears  
It's greyness stings my eyes  
Where the hell is the gloom?  
What the fuck, I am so doomed Starlight from the sky  
Lead my heart and tell me why?  
Starlight from the sky  
Tell me why? With open arms, I am crying  
With open arms, I'm going down  
Wind blows my joy away  
Help me out of these mournful days Starlight from the sky  
Lead my heart and tell me why?  
Starlight from the sky  
Tell me why? Too many days, I had no faith  
I wish I had someone to blame  
Someone to blame Starlight from the sky  
Lead my heart and tell me why?  
Starlight from the sky  
Tell me why? Why? Break down
