

Vice Verses

Switchfoot

Walking along the high tide line
Watching the Pacific from the side lines
Wonder what it means to live together
Looking for more than just guidelines Looking for signs in the night sky
Wishing that I wasn't such a nice guy
Wonder what it means to live forever
Wonder what it means to die(Chorus)
I know there's a meaning to it all
A little resurrection every time I fall
You got your babies
I got my hearses
Every blessing comes with a set of curses
I got my vices
Got my vice verses
I got my vice verses The wind could be my new obsession
The wind could be my next depression
The wind goes anywhere it wants too
Wishing that I learned my lesson
The ocean sounds like a garage band
Coming to me like a drunk man
The ocean telling me a thousand stories
None of them are lies(Chorus)
I know there's a meaning to it all
A little resurrection every time I fall
You got your babies
I got my hearses
Every blessing comes with a set of curses
I got my vices
Got my vice verses
I got my vice verses Let the Pacific laugh
Beyond my epitaph
With its rising and falling and after all
Its just water and I am just soul
With a body of water and bones
Water and bones Where is God in the city life?
Where is God in the city light?
Where is God in the earthquake?
Where is God in the genocide? Where are you in my broken heart
Everything seems to fall apart

Everything feels rusted over
Tell me that you're there(Chorus)
I know there's a meaning to it all
A little resurrection every time I fall
You got your babies
I got my hearses
Every blessing comes with a set of curses
I got my vices
Got my vice verses
I got my vice versesI got my vice verses
