

Feel

The Verve

This darkness cooled my light
We move to different sides
I poured the guilt right over my eyes
As I rose to greet the sky I've never felt this before
See you dead on the floor
I can't recall a single day
That's gonna make this pain slip away My senses have been so cold
Didn't know how to feel or hold
For a second I felt something in you
For a second I believed in you And I wanna know
And I wanna be
And I wanna feel And I wanna know
And I wanna be
And I wanna feel And I wanna know
And I wanna be
And I wanna feel And I wanna know
And I wanna be
And I wanna feel We could, my friend
We can
We could, my friend
We can We should not end
I wanna be part of [unverified] And I wanna know
And I wanna be
And I wanna feel
