

# All Over My Head

Matthew Sweet

Bad blood set you up for a fall  
You think you're so smart that you're fooling us all  
But it seems, you must have done something wrong  
You say you'll get back if you have to crawl  
Well, it's a fat chance you could make it at all  
And it seems, you must have done something wrong  
And I remember of what you said  
It was all over my head  
But now it's coming back to me  
You don't have the system beat, no  
You're traveling down a one way street like the rest of us  
You must have done something wrong  
And I remember what you said  
It was all over my head  
But now it's coming back to me  
And I remember what you said  
It was all over my head  
But now it's coming back to me  
It was all over my head  
But now it's coming back to me  
You must of done something wrong  
It was all over my head  
You must of done something wrong  
It was all over my head
