

We'rewolf

Every Time I Die

Turn the lights off, turn the lights off
Your daddy better lock up his girl
Say a prayer boy, call on the cops
'Cause you ain't gotta run when the music comes on
Board up the doors, the windows
And keep your crying under your breath
'Cause I smell a drop of fear in a ten gallon tank
And I'm movin' in for the kill
Yeah, in the wild kingdom
You don't live 'til you're ready to die
You don't live 'til you're ready to die
You don't live 'til you're ready to die
You don't live 'til you're ready to die
Which one of you sons of bitches
Is going to make me feel alive?
Which one of you motherfuckers
Is going to get inside my heart
Is going to get inside my heart
Is going to get inside my heart
Is going to get inside my heart
Whoa! It's a full moon, death in the sky
And the [Incomprehensible] circus is freaking out
Run for your life, cover your eyes
I don't want you to see me while I'm a little high
I've got a bone to pick with
The morning sun and the first five
But I didn't put my hair in a pony tail for nothing
So if I'm going home alone I'm not going at all
Yeah, in the wild kingdom
You don't live 'til you're ready to die
You don't live 'til you're ready to die
You don't live 'til you're ready to die
You don't live 'til you're ready to die
Which one of you sons of bitches
Is going to make me feel alive?
Which one of you motherfuckers
Is going to get inside my heart
Is going to get inside my heart
Is going to get inside my heart
Is going to get inside my heart
Look away it's too much to bare
I've been bitten by the party animal
Save yourself, save yourself
And tell my baby that I loved her so
Don't cry, don't cry
I gave the world one hell of a time today
Don't regret a thing
Except for the times that I got caught givin' in
Hey, hey, hey! I never thought it would take
A hair [Incomprehensible]
So where are you supposed to escape

When the creature is lurking inside you?
