

Fever

Deaf Havana

I broke down through everything and you tried your best
To live through the state I was in oh I know
I remember all those dark days with darker friends when I wouldn't come home
You'll never get back a piece of yourself that I stole I know you keep it all in your head locked away and I
I can't fight the feeling, I can't fight the feeling inside
It's the little things, oh it's the little things that you hide
Even you can see, I got the fever in me I was beat down and drunk as hell when I lost my home
I guess I knew what was coming for me then
I saw myself in my mothers eyes and I found some hope
This is not for me to start over again
I know you keep it all in your head locked away and I
I can't fight the feeling, I can't fight the feeling inside
It's the little things, oh it's the little things that you hide
Even you can see, I got the fever in me
I got the fever in me
I got the fever in me
I got the fever in me
I got the fever in me
And I know you keep it all in your head locked away and I
I can't fight the feeling, I can't fight the feeling inside
With a steady hand and a little time you will find
That even you can see, I got the fever in me
I got the fever in me
I got the fever in me
I got the fever in me
