Underneath the Surface

Scar Symmetry

Judging by the outside
No one sees the inner plague
Managing to spread your infestation
Through what you do and sayUnderneath your surface
Hides another face
Underneath that false smile
Contempt lies buriedClose your eyes
And enter another state of mind
An internal center awaits inside
Murder your desire by escaping time
In the dying embers, resurrect the fireEvery word you utter
Calculated hate
From within you're withering
In your own contemptJudging by the outside
No one sees the inner plague
Managing to spread your infestation
Through what you do and sayClose your eyes
And enter another state of mind
An internal center awaits inside
Murder your desire by escaping time
In the dying embers, resurrect the fireClose your eyes
And enter another state of mind
An internal center awaits inside
Murder your desire by escaping time
In the dying embers, resurrect the fire
