

# Within a Dream

## Adamantium

I must leave but will not  
Fear clutters thought  
Without I am alone  
Learn from what is known  
I see you within a dream  
All to dark to be seen  
In the past we have talked through friendship  
I'm living thought  
Why must it happens to us  
Our future will be small  
But not enough  
To make us part is what you sealed inside my heart  
It's coming down again  
So hard to breath with these blindfolded eyes  
I find myself facind reality  
You're not alone  
I'm still your friend  
Stand right behind you until the fucking end.
