

# Animal

## Dead Moon

Mechanical wires and hidden desires  
Gets you so tired, realise you've been fired  
    Your ambition, your position is lost  
Your the hostage working for the new age  
    The force of unthinkers, the system dog  
        The concrete line, the sex-drive unit  
The trenches of agony, yeahYour just an animal with no way out  
    Your getting restless everydayPopulation, extermination  
        The disease to expire, it's a desperate fix  
            The damaged are screened  
                By a steel machine  
                    They just hook you into the chair  
But don't you worry 'bout the sweat on your brow  
    Your dangerous now, you can't get a job  
        The panic crunch-you just better run  
Your marked, you're a target, a victimYour just an animal with no way out  
    Your getting restless  
        Your getting restless everyday
