Cold Late Night

A Telemetry

you're lost - under waves of sad design
you're loosing all strength
and finding that you were blind

life has bowled you over

feeling blue - on a cold late night
I'm crawling over
feelings true - such a cold late night
will make you sober

at last - you think you found a cure
it evades your will
and locks you out once more

life has froze you under

feeling blue - on a cold late night
I'm crawling over
feelings true - such a cold late night
will make you sober
