

Gemini

Alabama Shakes

On a planet not so far away
We were born together
In the beginning there was just you and me
Where we was a star up on a ferry
Suckle on the honey of the Tennessee
Where we would sleep, in the South sunshine
I smile at you and you to me And in the dark, I see the moon
Shine in your eyes, we were so
And that is when, never left and never been to
No such thing
I looked at you, and you looked into me
And we saw in each other, everything
We knew no fear as we grooved through
Best of growing up, we've come to love On this planet not so far away
We were to stay together
Go roll over in a dream
We drift apart, on down the stream
The honeysuckle taking up in love supply
The snake that lay in the Sun, so fire
I smiled at you and you to me And in the night, I'd see the dark
Inside of you
Walk from trees to look like wings
Never knew no better, there was no such thing
I reached for you like a child between
Oh we saw in each other, everything
Everything
Everything
