

Dancing For Rain

Rise Against

Were losing daylight but I cant work any faster
Under the veil of dusk we go on
Don't close your eyes
What if it all disappears in the shadows that reach for the stars? If I held my ground, would you ask me to change
This drought bleeds on now were dancing for rain?
We drink the air but it's still not the same
These worlds collide but the distance remains
We point the finger, never accept the blame and I know, I know
Lets go The waters come but the fire still rages on here
The men all shrugged their shoulders and left
We sleep so sound in rooms just up the stairs
Will you save us like you saved them? If I held my ground, would you ask me to change
This drought bleeds on now were dancing for rain?
We drink the air but it's still not the same
These worlds collide but the distance remains
We point the finger, never accept the blame and I know, I know You've bled me dry but I'm still breathing
I swear, I'm sucking dry the sky
And you wont ever find us kneeling
Or swallowing your lies If I held my ground, would you ask me to change
This drought bleeds on now were dancing for rain?
We drink the air but it's still not the same
These worlds collide but the distance remains
We point the finger, never accept the blame and I know, I know This drought bleeds on
This drought bleeds on
